Art Unit: 3738

This application was previously handled by an Examiner no longer with the Patent and Trademark Office. The application is directed to various subcombinations that are patentably distinct. It appears that the current claims are directed to the feature of a malleable tubing, therefore no further breakdown is required with respect to the other subcombinations that are not claimed.

A note to the applicant, claim 45 depends from cancelled claim 44.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: claims 37-39,41-43,45-54 are currently pending. Claim 37 is directed to a one piece, malleable hollow shaft as shown in figures 3,9 & 10. Claim 43 is directed to a shaft comprising a plurality of uniform shaft segments as shown in figures 1 and 7c. Claim 46 is directed to a shaft constructed of pellets disposed within an outer tubing which is not shown in any figures. Claim 51 is directed to a shaft comprising a series of ball/socket segments and an outer tubing. This embodiment is not shown in the figures. .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3738

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Paul Schaafsma on 3/14/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 3738

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
